IDEXX REFERENCE LABORATORY TEST REPORT

CINNAMON CHEN

PET OWNER:	**CHEN**	**SILVER STAR ANIMAL HOSPITAL**		LAB ID #:	6006665957
PATIENT ID:	37709	633 SILVER BLVD UNIT # 12		ORDER ID #:	343855213
SPECIES:	FELINE	SCARBOROUGH, ONTARIO M1V 5N1		COLLECTION DATE:	**09/30/2026**
BREED:	DEVON REX	416-332-8987		DATE OF RECEIPT:	**10/01/2026**
GENDER:	MALE	ACCOUNT #:	83H	DATE OF REPORT:	**10/01/2026**
AGE:	2Y19D	ATTENDING VET:	WENJIN DU	*** FINAL REPORT ***	
MICROCHIP #:					

IDEXX SERVICES: **FV2**

SEROLOGY

TEST	RESULT	UNITS
FeLV Antigen by ELISA [a]	Negative	
FIV Antibody by ELISA [b]	Negative	

NOTES

SEROLOGY

a The American Association of Feline Practitioners highly recommends confirming FeLV ELISA positive results. Consider the FeLV Quant RealPCR Test (test code FELVRQ).

b The American Association of Feline Practitioners highly recommends confirming FIV ELISA positive results with a different test. In cats older than 6 months of age, consider confirming the positive results with a Feline Triple Screen (test code FTS) or FIV SNAP testing performed in house, an FIV Western Blot (test code WBFIV) and/or an FIV RealPCR Test (test code FIVR). Maternal antibody may be present in uninfected kittens younger than 6 months of age.
